

Chapter 1

First Chapter

Both the head and foot are empty, and there is no page number (however, the pages are counted). To forcefully turn off page number showing in the chapter beginnig page, use `/thispagestyleempty` in that page. The beginnig of first chapter.

1.1 First Section

The start of section one.

1.1.1 First subsection

The start of sub-section one.

First sub-sub-section

The start of sub-sub-section one. Sub-sub-sections are **not** numbered in case of **article** class.

Chapter 2

Running Header and Footer

By default, `/thispagestyleplain` is issued by the document-classes of `article`, `book`, and `report` to the `/maketitle` command and the first page of major sectioning commands, like `/part` or `/chapter`. To suppress the effect of `/thispagestyleplain` on these pages, `/thispagestyle` with an appropriate page style may be used just after the `/maketitle`, `/part` or `/chapter` command, e.g., `/thispagestyleempty` may be used to suppress the default page numbering on these pages.
