....

## Chapter 2

# Running Header and Footer

By default, `/thispagestyleplain` is issued by the document-classes of article, book, and report to the `/maketitle` command and the first page of major sectioning commands, like `/part` or `/chapter`. To suppress the effect of `/thispagestyleplain` on these pages, `/thispagestyle` with an appropriate page style may be used just after the `/maketitle`, `/part` or `/chapter` command, e.g., `/thispagestyleempty` may be used to suppress the default page numbering on these pages.

### 2.1 First Section
