Preface

books class document comes with twoside printing option as default. **while others don't**

Chapter 1

First Chapter

myheadings style is user defined. It works by redefining /chapter-mark, /sectionmark, and /subsec-tionmark with the help of /renew-command [ ] command. The beginnig of first chapter.

1.1 First Section

The start of section one.

1.1.1 First subsection

The start of sub-section one.

First sub-sub-section

The start of sub-sub-section one. Sub-sub-sections are **not** numbered in case of **article** class.

Chapter 2

Running Header and Footer

By default, /thispagestyleplain is issued by the document-classes of article, book, and report to the /maketitle command and the first page of major sectioning commands,like /part or /chapter . To suppress the effect of /thispagestyleplain on these pages, /thispagestyle with an appropriate page style may be used just after the /maketitle, /part or /chapter command, e.g., /thispagestyleempty may be used to suppress the default page numbering on these pages.

2.1   1st Section
