```
Breadth (b)      = 3.00
Depth (d)        = 2.00
Height (h)       = 4.00
Volume (V)       = bdh = 24.00
Base Area (A)  = bd   = 6.00
```

Here is another way to create column in tabbing environment using **kill command**.

```
Breadth (b)      = 3.00
Depth (d)        = 2.00
Height (h)       = 4.00
Volume (V)       = bdh = 24.00
Base Area (A) = bd   = 6.00
```
